OR Forum

NGB/LNMB conference

2018

1.
Data Science is a hype; the OR community should not pay attention to it.

2.
Operations Research is part of Data Science.

3.

An Operations Research master curriculum should also contain Data Science courses.

4.

LNMB should add a PhD course on Data Science related topics.

5.
Research in Operations
Research should get a stronger focus on data.

6.

We need a stronger connection between predictive and prescriptive analytics.

7.

Data Science is not always about Big Data. In many cases the Big Search Space is the core problem.

8.

Operations Research should have more joint research programs with Computer Science and Econometrics.

9.

Data Science is a game changer for the practice of Operations Research.

10.

Data Science is a game changer for scientific research in Operations Research.
