

Dutch Optimization Seminar: Call for 2x PhD talks on Thursday, December 9th

The call is now open for 2x contributed PhD talks for the Dutch Optimization seminar on Thursday December 9th (4pm-5pm). Each PhD talk is 25 mins + 5 mins for questions, and can be on any topic of interest to the optimization and theoretical computer science community. This is an exciting opportunity to give a talk in a friendly environment and to get feedback from your peers.

To submit a talk proposal, please fill out the following google form by ***Thursday October 21st***:

<https://forms.gle/k5FnRyRAwh3BFJun7>

(you should be able to edit after submission in case you want to change something before the deadline)

In the form, you are asked to provide basic biographical information as well as the title and abstract of your talk. You are also encouraged to provide a link to the relevant paper(s) as well as a link to your website (with your research publications), though these are by no means required. The talks will be evaluated by the organizational committee based on the quality of the proposed talk. The 2 selected speakers will be informed by Friday November 5th.

For more information about the Dutch Optimization Seminar, including videos of past talks, please visit the seminar homepage here:
