Postdoctoral Researcher

INSEAD Humanitarian Research Group || Technology and Operations Management area

The INSEAD Humanitarian Research Group

Over the past 17 years, INSEAD Humanitarian Research Group (HRG) has been one of the world-leading research groups on humanitarian logistics. We actively collaborate with major humanitarian organizations to profoundly analyse logistical challenges and propose solutions. Key collaborators include UNICEF, WFP, UNHCR, the Red Cross Movement, MSF, OXFAM, World Vision, Plan International, North Star Alliance, and Marie Stopes International. In small research teams, we analyze their problems, gather data, perform analyses, and present and/or implement results. We are specialized in five key areas:

- Disaster Preparedness & Response
- Access & Equity in Healthcare
- Public-Private Partnerships
- Asset Management & Deployment
- Environment & Waste

The group consists of 7-12 researchers and has a collegial and constructive working environment. HRG is also connected to a vast network of world leading experts in fields like strategy, logistics, marketing, and health policy, and many humanitarian organizations.

Role description

As a postdoctoral researcher, you will join the Humanitarian Research Group and INSEAD's Technology and Operations Management Area.

Your role will be threefold. First, you will be responsible for a few (usually 2-3) research projects with humanitarian organizations and apply for/develop new research projects. This involves project management, supervising research staff working on them, maintaining relationships with humanitarian organizations involved, scanning calls for proposals, and writing proposals/research plans. Second, you will help turn our projects into high quality case studies and academic papers. Third, you will be responsible for the daily management of HRG. This involves project/personnel planning, contracting, organizing group meetings/group events, updating the website, dealing with contacts and potential sponsors, representing the group at workshops and conferences, and generally helping monitor on-going disasters and crises throughout the world.

The position provides a unique opportunity to work with a team of passionate experts at one of the most renowned business schools in the world.

The Business School
for the World®
