

Special Issue
of
Discrete Applied Mathematics

for the
17th Cologne-Twente Workshop on Graphs and
Combinatorial Optimization (CTW 2019)

Deadline: November 30, 2019

Following the tradition of previous CTWs, a special issue of Discrete Applied Mathematics will be dedicated to the 17th Cologne-Twente Workshop on Graphs and Combinatorial Optimization (CTW 2019, <https://wwwhome.ewi.utwente.nl/~ctw/>), held on July 1-3, 2019, at the University of Twente, Enschede, Netherlands.

All interested researchers are invited to contribute to this special volume. The topics should relate to the themes of the workshop (graph theory, combinatorial optimization and the design and analysis of algorithms). Submissions of contributions not presented at the workshop are also welcome.

All articles will be thoroughly refereed according to the high standards of Discrete Applied Mathematics.

The full papers must be submitted through the Elsevier Editorial Manager (<https://www.editorialmanager.com/dam/>). When submitting your paper, make sure that you specify that the paper is a submission to the special issue of CTW 2019 by selecting "SI: CTW 2019" as article type.

Looking forward to your contribution,

The guest editors,
Johann Hurink & Bodo Manthey
