Dear colleague,

We are organizing the session stream on "Mobility and Traffic" at OR2023 in Hamburg (August 29th-September 1st 2023). You can find the call below.
We would be very delighted if you would organize a session, and/or present a paper. Of course, please forward this email to any colleague who might be interested.

Kind regards

Marie and Max

Call for Session / Mobility and Traffic
OR2023 in Hamburg
https://www.or2023.uni-hamburg.de/

The OR2023 brings together researchers and practitioners from mathematics, computer science, business/economics and other fields to exchange ideas and experiences in operations research, management science, analytics, and data science.
OR203 will take place from August 29th to September 1st, 2023 at the University of Hamburg, Germany.

We invite talks and/or proposals for sessions in the fields of mobility and traffic in the broadest sense. We would be delighted if you are interested to organize a session of 3-4 talks on some particular topic within this stream. This task involves choosing the specific topic, contacting speakers and handling their submission in the online system of the conference, to which you will then get access.
Usually, but not necessarily, the session organizer is also session speaker and/or chair.

If you are interested in organizing a session please send a short email to Marie Schmidt (marie.schmidt@uni-wuerzburg.de) or Maximilian Schiffer (schiffer@tum.de).

If you are interested in submitting a presentation, you can submit your abstract directly to the Mobility and Traffic stream by using the following submission code: a0c9a249

Important dates:
Deadline abstract submission: April 30, 2023
Conference start: August 29, 2023

We hope to see you in Hamburg

Marie Schmidt and Maximilian Schiffer
