

Dear all,

The Center for Healthcare Operations Improvement and Research (CHOIR) at the University of Twente announces the 26th talk in the ORAHS International Seminar Series.

The ORAHS International Seminars are planned monthly via MS Teams in the late afternoon (Europe), morning (US), or evening (Asia/Pacific) and are part of the EURO Online Seminar Series.

Please save the date and register for this seminar here:

<https://events.teams.microsoft.com/event/3bde728a-1506-4af3-a5e6-63dce3903c99@723246a1-c3f5-43c5-acdc-43adb404ac4d>

Our next speaker will be Professor Christina Büsing. Christina Büsing is a professor for combinatorial optimization at the RWTH Aachen University in Germany. She studied mathematics in Münster, Madrid and Berlin and finished in 2010 her PhD under the supervision of Rolf Möhring on the topic of “Recoverable Robust Combinatorial Optimization”. During her PostDoc-phase she started working on different problems related to health care optimization such as the placement of mobile medical units, the patient-to-room assignment and the appointment scheduling for GPs. By now, she supervises seven PhD students, she leads the student lab CAMMP (computational and mathematical modelling program) in Aachen and she is the founder and head of the Center for Algorithmics and Optimization at the RWTH.

On 25 March 2025, at 16:00 (CET), she will talk about “Fair planning of out-of-hours service for pharmacies”.

More information about Christina Büsing can be found here:
