

Postdoc position at Eindhoven University of Technology

Eindhoven University of Technology has a postdoc position for 2 years on modelling and optimization of high-tech and biomanufacturing systems. Supervisors of the project are dr. Tugce Martagan, prof. Ivo Adan, and prof. Geert-Jan van Houtum. For this postdoc project, applicants need to have a PhD degree in operations research, industrial engineering, operations management, applied mathematics, statistics, or a comparable domain with solid background in (stochastic) quantitative research methods. For more information, also on how to apply, see:
