

Workshop on the mathematics of future energy systems

Dear colleagues and friends,

Please consider to participate in a workshop on the mathematics of future energy systems, held at CWI, June 6, 2016. We found 6 excellent speakers who will show us some beautiful mathematical research problems inspired by energy systems. The speakers have a variety of backgrounds: complex systems, control, game theory, optimization, scientific computing, and stochastics.

The speakers as well as future updates can/ will be found at <http://event.cwi.nl/maf2016/>

For delicious food, and energizing drinks please register at <http://event.cwi.nl/maf2016/>

Hope to see you there!

best wishes,

Daan Crommelin and Bert Zwart
